

Devoted to women's healthcare, the Women's Health Connecticut Laboratory has been providing patients with a high-level of specialized care for laboratory testing since 2013.

Our group's laboratory offers a broad range of tests designed to meet the comprehensive needs of our gynecologic and obstetric patients. Testing that cannot be completed at our laboratory will be handled by our partners at Quest Diagnostics.

As a part of the Women's Health Connecticut service line, we have direct access and quality control over these specimens and access to our own laboratory medical director and gynecological pathologists.

As with any laboratory and its services, we cannot guarantee that all services will be covered 100% under each patient's insurance plan. Therefore, once your insurance company is billed for laboratory services, you will receive an Explanation of Benefits ("EOB") from your insurer that will show you the patient responsibility, if any. You may receive an additional EOB from Quest Diagnostics for tests not performed by our lab. We do not anticipate a significant difference, if any, in financial impact.

If you have any questions relating to your EOB or your bill, please direct them to 800-889-3333.
